

September 2017 - July data

Education EI jump

Employment Insurance (EI) initial and renewal claims received jumped 12 per cent over June to 28,670, seasonally adjusted in July. Most of this increase was due to the shorter waiting period introduced earlier this year and to the end of the school year. There was a 17 per cent run-up in professional occupations in education services beneficiaries in July over June.

Total EI beneficiaries receiving regular benefits edged up 1.5 per cent to 50,980 in July over June. Notwithstanding increases due to the last regulatory change, EI counts have remained low and the July result is among the lowest since the last recession.

There was a very large surge in EI regular beneficiaries in the Williams Lake area during July with a near doubling to 690 from 370 in June. Forest wildfires caused evacuations and a huge disruption to the local economy. More forest-fire related unemployment could materialize in August.

Other areas to see large increases in EI counts over June were Powell River (up 32 per cent), Abbotsford-Mission (up 24 per cent) and Parksville (up 17 per cent).

EI counts are lower in most areas in the province during the past few years and further declines

are expected with ongoing economic and job growth in 2018.

Notes and Definitions

The Employment Insurance Trends report is a supplement to Central 1 Credit Union Economics' monthly Regional Labour Market Report which reviews the latest Labour Force Survey (LFS) data over an identical reference period. Labour Force data is the only timely and relevant source for regional employment counts, labour force participation, and unemployment rates, but are limited in geographic scope. This Employment Insurance Trends report provides supplemental labour market information on changes in unemployment trends albeit and at more detailed and wider geographic areas than provided in LFS data. Additionally, EI data is less volatile than LFS information given EI counts are a census from administrative data obtained from Employment and Social Development Canada, in contrast to the LFS household survey.

EI and LFS unemployment counts are highly correlated. However, caution is warranted in interpreting EI counts following a sharp uplift in unemployment. Lower unemployment does lower EI counts, but in a period of persistently weak economic activity and high unemployment, EI counts may decline given limited duration of benefits even as unemployment remains elevated (see EI definition below). EI beneficiary counts over time follow unemployment and reflect both how quickly a regional economy recovers and maximum EI duration. More relevant are upward movements or spikes to EI counts, which point to increased stress in local labour markets.

Definition

EI regular benefits are offered to people who have lost their employment through no fault of their own (for example, because of a shortage of work or because they were employed in seasonal work) and who are ready, willing, and capable of working each day but unable to find work. The Employment Insurance (EI) program offers temporary financial assistance to Canadians and individuals who are legally entitled to work in Canada, have a valid Social Insurance Number and remain in Canada during their benefit period.

The number of beneficiaries is a measure of all people who received EI benefits from a reference period that coincides with the reference week of the Labour Force Survey (LFS)

EI regular benefits expire. Provided that individuals meet eligibility requirements, individuals can receive EI from 14 weeks to a maximum of 45 weeks. Actual length of benefits depend on the unemployment rate in the region at time of individual filing, and amount of insurable hours accumulated in the last 52 weeks or during the last claim. Individuals within regions with higher unemployment rates are eligible for a longer EI benefit duration. For example, maximum EI duration in the Vancouver economic region is 38 weeks, and 40 weeks in the Toronto economic region (at this writing). In comparison, the maximum in Northern Alberta is 45 weeks. Benefits do not change if a beneficiary moves regions following the commencement of a benefit period.

Data Sources:

This report is based on data adapted from Statistics Canada from the following Cansim Tables:

276-0035 Employment Insurance Program (EI), beneficiaries by province, census division, total and regular income benefits, declared earnings, sex and age; British Columbia; Regular benefits; Both sexes; 15 years and over

276-0034 Employment Insurance program (EI), beneficiaries receiving regular income benefits by province and census metropolitan category, seasonally adjusted; British Columbia

276-0022 Employment Insurance program (EI), beneficiaries receiving regular income benefits by province, declared earnings, sex and age, seasonally adjusted; British Columbia; Regular benefits; Both sexes; 15 years and over

Seasonal-adjustment of regional data and all calculations are computed by Central 1 Credit Union. Provincial seasonal-adjustment is provided by Statistics Canada. Monthly information
