

Retail Money Movement Solutions

Enhanced User Features (EUF) for *Interac* e-Transfer®

Features that your personal and small business customers will love.

As Canada's predominant person-to-person payments service, *Interac* e-Transfer is a secure and convenient method for your customers to send or receive funds. Now it just got better with the introduction of two enhanced user features that both your personal and small business customers will appreciate.

Request Money

Allow your customers to easily request money they are owed or to use as a friendly reminder when friends or family may have forgotten to pay them back.

To request money, the customer selects a contact, enters the amount, the deposit account, and sends the request. They can choose to add a personalized message, such as an invoice number if it's a business.

The contact receives an *Interac* e-Transfer notification requesting the funds. They fulfill the request by logging into their online banking, and the funds are immediately deposited into your customer's bank account.

Request Money. Between friends, it's a cool way to say "you owe me money". For businesses, it's an important tool to streamline payments.

Autodeposit. Makes *Interac* e-Transfer even easier for everyone.

Autodeposit

Interac e-Transfer is convenient. But for people waiting to be paid, it's never fast or easy enough. Autodeposit makes it even simpler to securely receive money transfers.

By linking their email address to their account at your financial institution, customers can deposit transfers without needing to answer security questions, select the financial institution or log into online banking. When the customer receives an *Interac* e-Transfer it is automatically deposited into the bank account associated with the email address and the customer receives a deposit notification.

It takes just seconds to set up and helps your personal customers and small business owners get back to doing what they love.

A game changer for small businesses

Autodeposit and Request Money via *Interac* e-Transfer will enable your small business customers to turn their online banking into their business payments hub.

With these features, they will be able to:

- Provide a convenient payment option for their customers
- Receive funds faster
- Track payments online
- Improve cash flow management
