

El claim drops widespread across many regions in February

Employment Insurance (EI) beneficiary claims declined in February due to a decline in claims across workers of all ages. The largest drop in number of claims in the month occurred for workers 25 to 54 years of old (down 3,300 claims) followed by workers 55 years old or more (down 690 claims), and, workers 15 to 24 years old (down 490 claims)

Seasonally-adjusted initial and renewal received claims declined in February by 9.1 per cent (to 68,840 claims). The decline in February stopped two consecutive months of increases. Claims this month are in line with the historical average for the month.

EI claims in Ontario's metropolitan centres decreased significantly in February by 3.7 per cent (to 87,010 claims), due to fewer claims in almost all its census metropolitan areas with only Ottawa and Hamilton posting small increases (50 more claims each). The largest decrease in claims in February occurred in Toronto, Oshawa, Windsor, London, Sudbury, and Guelph.

By occupation, manufacturing and utilities posted a significant 23.2 per cent claims drop in February, undoing the jump in claims from January. Other

occupations that helped push down claims in February include: natural resources and agriculture (down 1.4 per cent), trades, transport, and equipment operators (down 8.2 per cent).

Declines in EI claims were widespread in Ontario in February. This coincides with news this week that a significant number of industries are at or near capacity, necessitating employers' need to bring back workers or hire new ones. An instance of employers bringing back workers can be seen in the numbers posted by manufacturing and utilities workers. Atypical auto plant closures in January left many of those workers idle. Now that auto exports have partially recovered, employers in this sector are recalling workers and potentially hiring additional workers.

Notes and Definitions

The Employment Insurance Trends report is a supplement to Central 1 Credit Union Economics' monthly Regional Labour Market Report which reviews the latest Labour Force Survey (LFS) data over an identical reference period. Labour Force data is the only timely and relevant source for regional employment counts, labour force participation, and unemployment rates, but are limited in geographic scope. This Employment Insurance Trends report provides supplemental labour market information on changes in unemployment trends albeit at more detailed and wider geographic areas than provided in LFS data. Additionally, EI data is less volatile than LFS information given EI counts are a census from administrative data obtained from Employment and Social Development Canada, in contrast to the LFS household survey.

EI and LFS unemployment counts are highly correlated. However, caution is warranted in interpreting EI counts following a sharp uplift in unemployment. Lower unemployment does lower EI counts, but in a period of persistently weak economic activity and high unemployment, EI counts may decline given limited duration of benefits even as unemployment remains elevated (see EI definition below). EI beneficiary counts over time follow unemployment and reflect both how quickly a regional economy recovers and maximum EI duration. More relevant are upward movements or spikes to EI counts, which point to increased stress in local labour markets.

Definition

EI regular benefits are offered to people who have lost their employment through no fault of their own (for example, because of a shortage of work or because they were employed in seasonal work) and who are ready, willing, and capable of working each day but unable to find work. The Employment Insurance (EI) program offers temporary financial assistance to Canadians and individuals who are legally entitled to work in Canada, have a valid Social Insurance Number and remain in Canada during their benefit period.

The number of beneficiaries is a measure of all people who received EI benefits from a reference period that coincides with the reference week of the Labour Force Survey (LFS)

EI regular benefits expire. Provided that individuals meet eligibility requirements, individuals can receive EI from 14 weeks to a maximum of 45 weeks. Actual length of benefits depend on the unemployment rate in the region at time of individual filing, and amount of insurable hours accumulated in the last 52 weeks or during the last claim. Individuals within regions with higher unemployment rates are eligible for a longer EI benefit duration. For example, maximum EI duration in the Vancouver economic region is 38 weeks, and 40 weeks in the Toronto economic region (at this writing). In comparison, the maximum in Northern Alberta is 45 weeks. Benefits do not change if a beneficiary moves regions following the commencement of a benefit period.

Data Sources:

This report is based on data adapted from Statistics Canada from the following Cansim Tables:

276-0035 Employment Insurance Program (EI), beneficiaries by province, census division, total and regular income benefits, declared earnings, sex and age; British Columbia; Regular benefits; Both sexes; 15 years and over

276-0034 Employment Insurance program (EI), beneficiaries receiving regular income benefits by province and census metropolitan category, seasonally adjusted; British Columbia

276-0022 Employment Insurance program (EI), beneficiaries receiving regular income benefits by province, declared earnings, sex and age, seasonally adjusted; British Columbia; Regular benefits; Both sexes; 15 years and over

Seasonal-adjustment of regional data and all calculations are computed by Central 1 Credit Union. Provincial seasonal-adjustment is provided by Statistics Canada. Monthly information provided in this report is computed on seasonally-adjusted data, year-to-date calculations are computed on actual unadjusted data.
