

El claims dropped across most Census Metropolitan Areas

Monthly Employment Insurance (EI) regular beneficiary claims dropped in March for the second consecutive month, similar to February, due to a decline in claims across all age groups. The largest drop occurred for workers 15 to 24 years of age and 25 to 54 years of age; for those workers 55 years of age or older, claims stayed relatively the same only decreasing 0.2 per cent - or 60 claims - in the month.

Seasonally-adjusted initial and renewal received claims increased in March by 3.4 per cent to 71,110 after declining by 9.5 per cent in February. So, some of the decline in claims from February was erased in March but not completely. Claims this month, despite the bump up, remained over two per cent lower than the long-term monthly average.

In Ontario's urban areas, EI claims dropped in March in Census Metropolitan Areas (CMA) and Census Agglomerations (CA). In Ontario's denser CMAs, EI claims dropped for the second consecutive month across almost all areas with a few exceptions. Even though the increased claims were minimal, ranging from ten additional claims to as much as 40 new claims, claims inched up in Brantford, Guelph, Kitchener-Cambridge-Waterloo, and London. On the flipside, significant declines in claims occurred in Greater Sudbury, Kingston, Oshawa, St. Catharines-Niagara, and, Thunder Bay.

Among occupations, large declines in claims occurred in:

- management, natural and applied sciences
- art, culture, recreation and sport
- trades, transport and equipment operators;
- natural resources and agriculture
- manufacturing and utilities

Together these occupations dropped 3,250 claims in the month. The largest drop this month came from trades, transport and equipment operators which dropped 2,010 claims. The largest increase in claims by occupation in March occurred in education, law and social, community and government services-related occupations (up 1,500 claims).

Across many of Ontario's large centres, the need for labour is pulling people from the sidelines and back to work. The jump in claims in education, law and social, community and government services-related occupations may be related to the strike by workers at York University in Toronto that has continued to drag on with no resolution in sight.

Notes and Definitions

The Employment Insurance Trends report is a supplement to Central 1 Credit Union Economics' monthly Regional Labour Market Report which reviews the latest Labour Force Survey (LFS) data over an identical reference period. Labour Force data is the only timely and relevant source for regional employment counts, labour force participation, and unemployment rates, but are limited in geographic scope. This Employment Insurance Trends report provides supplemental labour market information on changes in unemployment trends albeit at more detailed and wider geographic areas than provided in LFS data. Additionally, EI data is less volatile than LFS information given EI counts are a census from administrative data obtained from Employment and Social Development Canada, in contrast to the LFS household survey.

EI and LFS unemployment counts are highly correlated. However, caution is warranted in interpreting EI counts following a sharp uplift in unemployment. Lower unemployment does lower EI counts, but in a period of persistently weak economic activity and high unemployment, EI counts may decline given limited duration of benefits even as unemployment remains elevated (see EI definition below). EI beneficiary counts over time follow unemployment and reflect both how quickly a regional economy recovers and maximum EI duration. More relevant are upward movements or spikes to EI counts, which point to increased stress in local labour markets.

Definition

EI regular benefits are offered to people who have lost their employment through no fault of their own (for example, because of a shortage of work or because they were employed in seasonal work) and who are ready, willing, and capable of working each day but unable to find work. The Employment Insurance (EI) program offers temporary financial assistance to Canadians and individuals who are legally entitled to work in Canada, have a valid Social Insurance Number and remain in Canada during their benefit period.

The number of beneficiaries is a measure of all people who received EI benefits from a reference period that coincides with the reference week of the Labour Force Survey (LFS)

EI regular benefits expire. Provided that individuals meet eligibility requirements, individuals can receive EI from 14 weeks to a maximum of 45 weeks. Actual length of benefits depend on the unemployment rate in the region at time of individual filing, and amount of insurable hours accumulated in the last 52 weeks or during the last claim. Individuals within regions with higher unemployment rates are eligible for a longer EI benefit duration. For example, maximum EI duration in the Vancouver economic region is 38 weeks, and 40 weeks in the Toronto economic region (at this writing). In comparison, the maximum in Northern Alberta is 45 weeks. Benefits do not change if a beneficiary moves regions following the commencement of a benefit period.

Data Sources:

This report is based on data adapted from Statistics Canada from the following Cansim Tables:

276-0035 Employment Insurance Program (EI), beneficiaries by province, census division, total and regular income benefits, declared earnings, sex and age; British Columbia; Regular benefits; Both sexes; 15 years and over

276-0034 Employment Insurance program (EI), beneficiaries receiving regular income benefits by province and census metropolitan category, seasonally adjusted; British Columbia

276-0022 Employment Insurance program (EI), beneficiaries receiving regular income benefits by province, declared earnings, sex and age, seasonally adjusted; British Columbia; Regular benefits; Both sexes; 15 years and over

Seasonal-adjustment of regional data and all calculations are computed by Central 1 Credit Union. Provincial seasonal-adjustment is provided by Statistics Canada. Monthly information provided in this report is computed on seasonally-adjusted data, year-to-date calculations are computed on actual unadjusted data.
