

Ontario Employment Insurance Trends

Average monthly employment insurance (EI) beneficiaries in Ontario fell 0.6 per cent in November over October to 120,370. People 25 to 54 years of age, which made up over 2/3 of all people currently receiving benefits, posted the largest decline. In November, of the 710 fewer people receiving benefits 590 came from this group. Workers 15-24 years of age saw average beneficiaries fell by 130 recipients.

Over the first eleven months of the year, average EI beneficiaries fell by 2.5 per cent in Ontario. Recipients 15 to 24 years of age fell by 2.5 per cent while recipients 25 to 54 years of age fell by 2.9 per cent and recipients 55 years of age or older fell by 1.6 per cent.

By occupation group, manufacturing and utilities posted the largest drop in the number of Ontarians receiving EI benefits in November falling by 840. Other occupation groups with large gains or losses in EI recipients included:

- Business, finance and administration occupations (down 110 recipients)
- Occupations in education, law and social, community and government services (down 350 recipients)
- Sales and service occupations (down 150 recipients)
- Trades, transport and equipment operators and related occupations (up 600 recipients)
- Unclassified occupations (up 250 recipients)

Finally, year-to-date, EI recipients have fallen in most economic regions of Ontario with the only exceptions being Kingston-Pembroke, increase of 0.6 per cent, and Windsor-Sarnia, increase of 0.2 per cent. The largest drop in EI recipients occurred in the Northwest region, down 7.3 per cent, Northeast, down 6.1 per cent, and, Ottawa, down 6.8 per cent. Toronto, the region with the largest absolute number of recipients in the province, accounting for nearly 40 per cent of recipients, fell by 2.3 per cent.

Job creation in Ontario, in spite of some uncertainties in the economy, continued to chip away at number of people on EI benefits and sitting idle on the sidelines.

Notes and Definitions

The Employment Insurance Trends report is a supplement to Central 1 Credit Union Economics' monthly Regional Labour Market Report which reviews the latest Labour Force Survey (LFS) data over an identical reference period. Labour Force data is the only timely and relevant source for regional employment counts, labour force participation, and unemployment rates, but are limited in geographic scope. This Employment Insurance Trends report provides supplemental labour market information on changes in unemployment trends albeit at more detailed and wider geographic areas than provided in LFS data. Additionally, EI data is less volatile than LFS information given EI counts are a census from administrative data obtained from Employment and Social Development Canada, in contrast to the LFS household survey.

EI and LFS unemployment counts are highly correlated. However, caution is warranted in interpreting EI counts following a sharp uplift in unemployment. Lower unemployment does lower EI counts, but in a period of persistently weak economic activity and high unemployment, EI counts may decline given limited duration of benefits even as unemployment remains elevated (see EI definition below). EI beneficiary counts over time follow unemployment and reflect both how quickly a regional economy recovers and maximum EI duration. More relevant are upward movements or spikes to EI counts, which point to increased stress in local labour markets.

Definition

EI regular benefits are offered to people who have lost their employment through no fault of their own (for example, because of a shortage of work or because they were employed in seasonal work) and who are ready, willing, and capable of working each day but unable to find work. The Employment Insurance (EI) program offers temporary financial assistance to Canadians and individuals who are legally entitled to work in Canada, have a valid Social Insurance Number and remain in Canada during their benefit period.

The number of beneficiaries is a measure of all people who received EI benefits from a reference period that coincides with the reference week of the Labour Force Survey (LFS)

EI regular benefits expire. Provided that individuals meet eligibility requirements, individuals can receive EI from 14 weeks to a maximum of 45 weeks. Actual length of benefits depend on the unemployment rate in the region at time of individual filing, and amount of insurable hours accumulated in the last 52 weeks or during the last claim. Individuals within regions with higher unemployment rates are eligible for a longer EI benefit duration. For example, maximum EI duration in the Vancouver economic region is 38 weeks, and 40 weeks in the Toronto economic region (at this writing). In comparison, the maximum in Northern Alberta is 45 weeks. Benefits do not change if a beneficiary moves regions following the commencement of a benefit period.

Data Sources:

This report is based on data adapted from Statistics Canada from the following Cansim Tables:

276-0035 Employment Insurance Program (EI), beneficiaries by province, census division, total and regular income benefits, declared earnings, sex and age; British Columbia; Regular benefits; Both sexes; 15 years and over

276-0034 Employment Insurance program (EI), beneficiaries receiving regular income benefits by province and census metropolitan category, seasonally adjusted; British Columbia

276-0022 Employment Insurance program (EI), beneficiaries receiving regular income benefits by province, declared earnings, sex and age, seasonally adjusted; British Columbia; Regular benefits; Both sexes; 15 years and over

Seasonal-adjustment of regional data and all calculations are computed by Central 1 Credit Union. Provincial seasonal-adjustment is provided by Statistics Canada. Monthly information provided in this report is computed on seasonally-adjusted data, year-to-date calculations are computed on actual unadjusted data.
